

Front-end Developer

Company Description

SmartSpot is a privately-owned IT Services Company, based in Cluj-Napoca, offering high quality and cost-effective solutions to their clients since 2011.

We provide tailored technical support & development through four major service offerings: Application Management, Testing, DevOps and Application Development.

We are a young and talented team with more than 10 years' experience in customer and business support services for the media streaming industry.

We promote an informal work environment and encourage various team activities.

Job description

We are seeking a driven, detail-oriented front-end developer to join our team. In this role, you will be responsible for understanding the client requirements and transform them into an easy to use frontend solution using the latest technology and frontend frameworks. You will work closely with our backend developer to design applications tailored for our customers' needs following the latest standards/recommendations on performance, security, scalability and code quality.

Responsibilities

- Planning, estimation, requirement analysis and prototyping new applications
- Designing the architecture of frontend application components
- Develop new user-facing features and fix issues in existing projects
- Optimize application for performance, security and scalability
- Deciding on the best technologies and languages depending on client needs
- Testing (manual and automatic) new features thoroughly to ensure they perform correctly in different environments and use cases

Skills

Mandatory

- 2 to 5 years of relevant work experience as a frontend engineer, UI developer, JavaScript developer
- Experience with Angular2+
- TypeScript, RxJS & angular-cli
- Experience with HTML and CSS
- Used CSS pre-processors before (Less or Sass)
- Proficient in using a Frontend Framework (e.g. Bootstrap/Clarity)
- Fluent in English
- Ability to take on and assimilate technical knowledge
- Able to learn quickly and work independently
- Working methodically

Desirable

- Unit testing and TDD development mindset
- Performance testing of a web app
- Experience with web app architecture design
- Linux knowledge
- Web/Browser security
- Proficient with Git CVS

Benefits

- Competitive salary
- Comprehensive training (Linux, Streaming & other attractive technologies)
- Opportunity to work in the exciting and challenging industry of media streaming
- International working experience
- Benefits package
